About

Dedicated web developer with a broad skill set, focusing on React-based development and Spring Boot. I continuously improve my skills through hands-on projects and enjoy competitive programming and data structures algorithms (DSA).

Education

IIIT Naya Raipur

B.Tech in Electronics and Communication

8.28/10

Aug. 2023 - Present

Project

MERN ChatApp 🔄

Socket.IO | React 18 | Express.js | MongoDB | Zustand

- Built a real-time **Chat Application** using **React 18**, **Express.js**, and **MongoDB** featuring **Socket.IO** for live messaging, media sharing, emoji reactions, and group management. Integrated **JWT**-based authentication, **Cloudinary** for media handling, and used **Zustand** for efficient global state. Designed a responsive and modern **glassmorphism** UI with **Tailwind CSS 3**, enhanced with **Framer Motion**, **Emoji Picker**, and **React Hot Toast**. Added local **message caching** with **IndexedDB** for performance.

MindEase 🔄

Next.js 15 | MongoDB | Google Gemini

- Built **MindEase**, a full-stack mental health platform enabling users to self-assess disorders via a diagnostic system, take severity-based specialized tests, and access meditation tools. Features include secure **custom authentication**, **email verification**, a personalized dashboard with streak and heatmap tracking, a community page, and a **Gemini-powered AI chatbot**. Deployed on Vercel with a focus on accessibility and modern UX.

Brutshop - E-commerce Platform 🔄

Spring Boot | React | Supabase | Cloudinary

- Built **BrutShop**, a full-stack Neo-brutalist **e-commerce app** with **JWT auth**, **role-based access**, and a sleek UI using **React 19**, **Vite**, and **Tailwind**. Backend with **Spring Boot 3**, **Spring Security**, and **Supabase**. Added **Cloudinary** image uploads, protected admin routes, cart management, debounced search, sliding cart drawer, dark mode, and **Sonner** toast alerts.

Achievements

- Solved **600+** coding problems across platforms including LeetCode, Codeforces, and CodeChef.
- Secured **2nd Runner-Up** in E-Cell Hackathon – an inter-college coding competition.

Technology

Languages: JavaScript, TypeScript, Java, Python, C

Frontend: React 19, Vite, Tailwind, Shadcn/UI, DaisyUI

Backend: Node.js, Spring Boot, Express, Firebase, Appwrite

Databases: MongoDB, PostgreSQL, NeonDB, Supabase, Convex

Authentication: JWT, Clerk, Spring Security, Role-Based Access Control

Other: Next.js, React Native, Zustand, Socket.IO, Docker, Kubernetes, Git
